7.  Examiner's Amendment/Comment
8.  Examiner's Statement of Reasons for Allowance
9.  Other \_\_\_\_\_.

1. The amendment filed on January 31, 2005 has been entered. Accordingly:
  - Claims 1, 3, 5-7 and 9 have been amended;
  - Claims 2, 4, 8 and 10 have been cancelled; and
  - The abstract has been amended.
2. On April 5, 2005, the examiner contacted the attorney, Mr. Kelvin S. Lemack, to inform that the amended Claim 1 includes allowable subject matter. However, a few of the recitations of claims 1 and 9 include editorial errors, which need to be corrected. In response, Mr. Lemack authorized an Examiner's amendment requiring the editorial corrections as detailed in section 3 of this office action. A copy of the interview summary is attached herewith.

***EXAMINER'S AMENDMENT***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kelvin S. Lemack on April 5, 2005.

Claim 1 (amended), line 2, replace "ore" with --or--; and

Claim 9 (amended), line 2, delete one set of "wherein each of said" as it is duplication.

***Allowable Subject Matter***

4. Claims 1, 3, 5-7 and 9 are allowed.

The prior art of record, including Luk (US Patent application Pub. No.: US 2002/0181231 A1) and Tait et al. (US Patent No.: 6,598,994 B1), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a light source system combining:

- a light mixer mounted at the vertex of a conical cover enclosing –covering- a plurality of blue, green and red light emitting diodes (LEDs) mounted on a spherical curved surface as recited in Claim 1.

The above-indicated combination, including: a light mixer mounted on at the vertex of a conical cover, and the conical cover mixer enclosing a plurality of multi-color light emitting diodes (LEDs) mounted on a spherical curved surface, makes this invention unique.

Tait et al. (US Patent No.: 6,598,994 B1) and Luk (US Patent application Pub. No.: US 2002/0181231 A1) each discloses a source system including an LED curved support being either a spherical curved support. However, neither combined nor individual teaching of Luk (US Patent application Pub. No.: US 2002/0181231 A1) and Tait et al. (US Patent No.: 6,598,994 B1) specifically teaches the combination of a light mixer mounted on at the vertex of a conical cover enclosing a plurality of multi-color light emitting diodes (LEDs) mounted on a spherical curved surface.

Therefore, Claim 1 is allowed over prior art.

Claims 2, 3, 5-7 and 9 are necessarily allowed because of their dependency on the allowed base Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
